

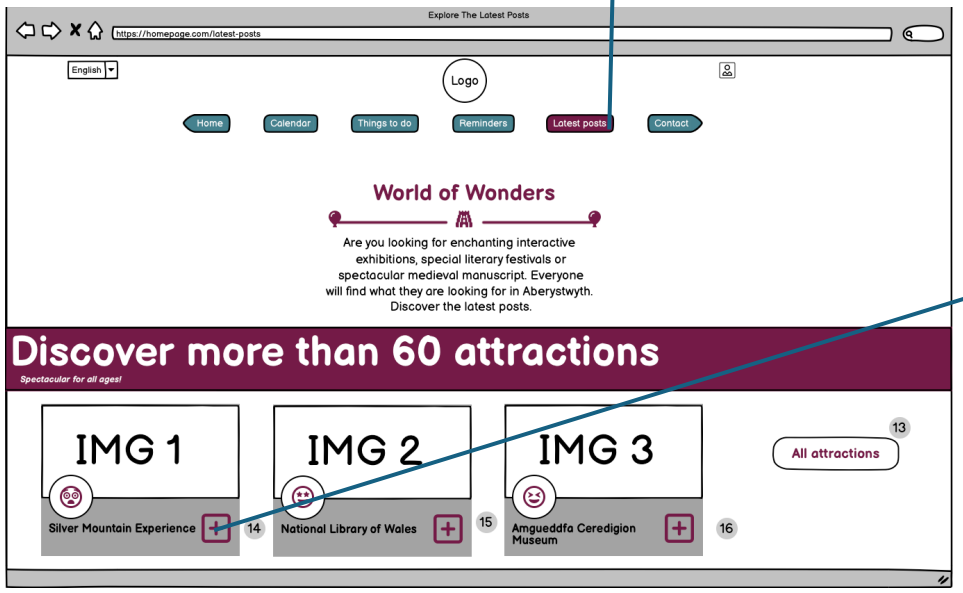
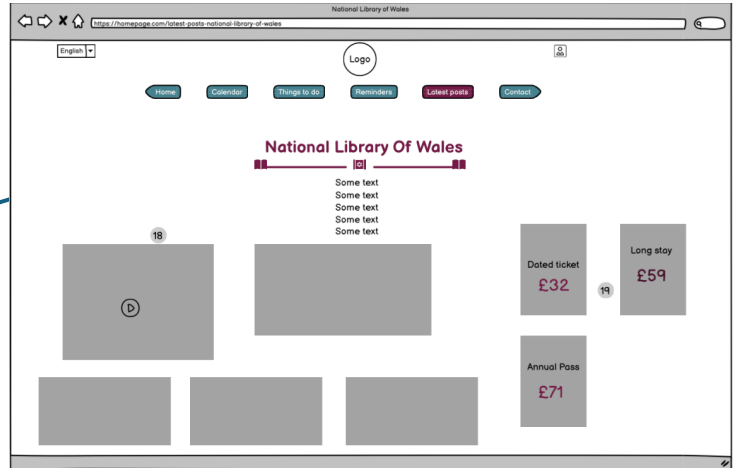
If the user presses on the left button or right button it will show a live twitter feed from a different twitter user showing a different moment or experience that they had.

If the user presses on the latest posts button it will redirect them to the latest posts page.





If the user presses on the plus button it will show more detail and information about the attraction.

Description

- 1. Multilingual Support: Integration of a language selector button enabling users to switch between languages, including English and other available options.
